PROFESSIONAL SUMMARY

Aspiring Cloud Engineer and Software Developer currently pursuing an NQF Level 6 Qualification in Software Development and Systems Engineering at WeThinkCode. Experienced in building robust backend microservices, infrastructure-as-code automation, and containerized deployment pipelines utilizing Python, Java, Docker, and Terraform. Proven track record as a Test Developer writing socket-based integration tests, automating GitLab CI/CD pipelines, and authoring cloud security tooling. Passionate about cloud infrastructure resilience, DevOps practices, and building highly available distributed systems.

TECHNICAL SKILLS

Cloud & Infrastructure:	Infrastructure as Code (Terraform), Docker Containerization, AWS (EC2, Security Groups, IAM), Azure Fundamentals, Cloud Architecture Security
DevOps & CI/CD:	GitLab CI/CD Pipelines, GitHub Actions, Linux Administration, Bash Scripting, Automation Tooling
Programming Languages:	Python, Java, Bash, SQL, HTML5, CSS3
Testing & Frameworks:	Unit Testing, Socket-based Integration Testing, JSON Helper Validations, Software Quality Assurance (ISTQB Principles)
Developer Tools:	Git, GitHub, IntelliJ IDEA, VS Code, KodeKloud, Canva

KEY TECHNICAL PROJECTS

Robot Worlds – Socket-Based Multiplayer Systems Engineering Jun 2026 – Jul 2026

Tech Stack: Java, Sockets, Multi-threading, JSON, GitLab CI/CD, Unit Testing

- Served as Test Developer for a multi-threaded socket-based client-server Java application simulating a world of interactive robots.
- Engineered socket-level acceptance tests and custom JSON helper validation modules to verify real-time client-server network requests.
- Configured and automated end-to-end `.gitlab-ci.yml` CI/CD build pipelines to ensure continuous delivery, static code analysis, and test suite execution.
- Collaborated with multi-disciplinary team members to deliver brownfields software refactoring on schedule.

CloudPhoenix – Automated Cloud Resilience Platform May 2026 – Jun 2026

Tech Stack: Python, Terraform, AWS (EC2, Security Groups, IAM), Linux

- Designed and deployed an automated cloud infrastructure management and resilience framework using Python and Terraform.
- Automated RSA key pair generation, network security group rules, and provisioned scalable compute nodes on AWS.
- Built automated cloud security monitoring scripts to identify misconfigurations and validate infrastructure uptime.
- Documented architectural diagrams and deployment workflows to facilitate modular environment duplication.

Student Grade Manager & Data Applications Mar 2026 – Apr 2026

Tech Stack: Java, Object-Oriented Programming, File I/O, Java Collections

- Architected an Object-Oriented Java application implementing Java Collections and File I/O for persistent student academic record tracking.
- Implemented custom error handling and input sanitation to enforce dynamic grade processing rules.

EDUCATION & CERTIFICATIONS

Diploma in Software Development & Systems Engineering (NQF Level 6) Feb 2025 – Present

WeThinkCode_ | Cape Town, South Africa

- Core Curriculum:** Object-Oriented Programming (Java/Python), Data Structures & Algorithms, DevOps & Cloud Engineering, Socket Programming, Distributed Systems, Database Management.

- **Practical Mastery:** Daily immersive Linux terminal workflows, peer programming, git branch-management, hands-on lab projects on KodeKloud (Docker & Terraform).

Professional Certifications Preparation

In Progress / Target 2026

- **AWS Certified Cloud Practitioner (CLF-C02):** Cloud concepts, security, architecture, pricing, and services.
- **Microsoft Certified: Azure Fundamentals (AZ-900):** Cloud service models, security, privacy, and governance.
- **ISTQB Certified Tester Foundation Level (CTFL):** Software testing principles, test management, and validation.

National Senior Certificate (Matric - Bachelor Pass)

Dec 2024

Ladysmith High School | KwaZulu-Natal

LEADERSHIP & PRACTICAL EXPERIENCE

Social Wellness Event Coordinator

Feb 2025 – Present

WeThinkCode_ Community

- Organize and execute campus-wide community initiatives, managing logistics, cross-functional communications, and scheduling.
- Promote peer collaboration, team cohesion, and work-life harmony within an intensive tech learning environment.

Women ThinkCode Initiative Member

Feb 2025 – Present

WeThinkCode_ Community

- Participate in peer mentorship networks and organize events dedicated to promoting diversity and empowering women in software engineering.

Administrative Assistant (Volunteer)

Jun 2022 – Dec 2024

Siyanakekela Drop-in Centre | Ladysmith

- Maintained digital filing systems, organized executive schedules, and managed stakeholder communications.
